Getting Started with AI Assist

Copilot for Microsoft 365 Readiness Assessment

Understand your organization's readiness to get started with Copilot for Microsoft 365.

The HBS team will work with you to:

- Identify your goals and build a business case for Copilot
- Assess your ability to implement Copilot today
- Define your Copilot implementation roadmap
- Develop your plan for communication, change management and AI use policies

Custom AI Assistant

Draw insights from your data using natural language and generative AI. The HBS team will work with you to develop a secure, self-contained AI assistant. Together we will:

- Define your use case and goals for the AI chat assistant
- Set up and prepare your data for context-aware search
- Test the model and refine search functionality
- Deploy the AI assistant and train your team for its successful use

Whatever need you have or opportunity we find to improve, streamline or automate your day-to-day processes, the HBS team is ready to support you with a customized solution.

Let's empower your team with AI Assist.
