

Managed SaaS Security

Comprehensive visibility, monitoring, and protection for your SaaS applications—fully managed by the HBS team.

Complete SaaS visibility. Real-time alerts.
Expert management.

You rely on your SaaS applications every day, but monitoring them—and ensuring their safety—is challenging. With Managed SaaS Security you'll get comprehensive visibility, control, and protection of your critical SaaS applications, including Microsoft 365 and Google Workspace. So you can focus on what matters most, confident that your data is secure and your users are protected.

Proactive SaaS Monitoring

Continuous surveillance of your SaaS environment to detect and respond to threats in real time, ensuring your applications stay secure.

Efficient Management of End-User Behavior

Maintain and enforce security settings according to best practices, preventing unauthorized changes and configuration drift.

Automated Threat Response

Rapid, automated actions to mitigate threats, including signing out compromised users and locking down affected accounts to minimize risk.

POWERED BY

Ensure security settings are enforced, prevent unauthorized changes, monitor for suspicious activity.

The HBS Difference in Managed SaaS Security

Deep Visibility

Detailed insights into user activities, Shadow IT, and security configurations of your SaaS applications.

Simplified Reporting

Easy-to-read, on-demand and scheduled reports that keep you informed about security events, risk levels, and compliance status.

Extended Log Retention

HBS retains log data for a full year—far surpassing Microsoft and Google's retention period—providing deeper insights for productivity analysis and incident response.

Intelligent Alert Management

Don't worry about alert fatigue. Our team will fine-tune alerts for immediate action, filtering out the noise and ensuring only legitimate threats trigger your attention.

Dedicated SaaS Security Team

HBS brings you a dedicated team of experts, whose primary focus is to manage, monitor, and support your SaaS security.

Unbeatable Value

High-level relationships with technology partners allow HBS to provide enhanced support and responsiveness, all while offering industry-best pricing.

Let's improve your
SaaS security posture
